**Purpose of Inspection:**

This inspection was done to document site conditions while in the area.

**Inspection Summary:**

1. While no one else was on site during this inspection, the site is considered active. This site recently received final approval of the LMO-NOI.
2. Over the past several months, the operator has been cleaning up trash that others have dumped at the site. My previous inspection I encouraged the operator to keep the mine site clean - a messy site seems to invite illegal dumping by others. This site is secured by partial fencing and signed gates at the portal area. The portal has a locked door to prevent entry to the underground workings.

**Conclusions and Recommendations:**

Continue to monitor this site when in the area.

**Inspector's Signature** 4 KP
